CONTENTS OF VOLUME 10

Abbott, L. See Chadwick, P., 853.
Abraham, T. A. and **Herr, L. J.** Activity of actinomycetes from rhizosphere and nonrhizosphere soils of corn and soybean in four physiological tests, 281.
Adams, A. M. Airborne yeasts from horticultural sites, 641.
Alexander, M. See Yoshida, T., 923.
Altenbern, R. A. and **Stull, H. B.** Edema factor and phospholipase release by a strain of *Bacillus cereus*, 717.
Anand, S. R. See Wirth, J. C., 23, 811.
Barratt, R. W. See Stine, G. J., 29.
Bayley, S. T. See Kushner, D. J., 483.
Berry, S. A. See Campbell, J. N., 659.
Bird, F. T. On the development of insect polyhedrosis and granulosis virus particles, 49.
Blackwood, A. C. See Jones, G. A., 371, 379; Joshi, N., 615.
Blakley, E. R. and **Simpson, F. J.** The microbial metabolism of cinnamic acid, 175.
Bobb, D. and **Lamb, D. C.** Some observations on pigments induced by *p*-aminobenzoic acid in *Neurospora crassa* cultures, 303.
Bollen, W. B. See Neal, J. L., Jr., 259.
Boring, J. See Kushner, D. J., 483.
Borowski, J. The development of penicillin-sensitive mutants in the course of natural and experimental infection with penicillinase-producing *Staphylococcus aureus* strains, 595.
Borrow, A., Brown, S., Jefferys, E. G., Kessell, R. H. J., Lloyd, E. C., Lloyd, P. B., Rothwell, A., Rothwell, B., and **Swait, J. C.** The kinetics of metabolism of *Gibberella fujikuroi* in stirred culture, 407.
The effect of varied temperature on the kinetics of metabolism of *Gibberella fujikuroi* in stirred culture, 445.
Boyd, J. W. See Boyd, W. L., 917.
Boyd, W. L. and **Boyd, J. W.** The presence of bacteria in permafrost of the Alaskan Arctic, 917.
Brent, M. M. See Groscop, J. A., 579.
Brown, L. R., Strawinski, R. J., and **McCleskey, C. S.** The isolation and characterization of *Methanomonas methanooxidans* Brown and Strawinski, 791.
Brown, S. See Borrow, A., 407, 445.
Bulmer, G. S. See Dowding, E. S., 783.
Campbell, J. N. See Nichols, J. L., 633.
Campbell, J. N., Nichols, J. L., and **Berry, S. A.** Characterization of the pigment of *Micrococcus violagabriellae*, 659.
Carson, K. J. and **Eagon, R. G.** Cellular disintegration with concomitant release of slime and production of extracellular mannan by *Pseudomonas aeruginosa*: Two separate phenomena, 467.
Carter, G. R. Correlation between hemagglutinating antibody and mouse protection in antipasteurella (*Pasteurella multocida*) sera, 753.
Casida, L. E., Jr. See Krywolap, G. N , 323, 365.
Chadwick, P. and **Abbott, L.** Specificity and sensitivity of a microcolony technique for fluorescent antibody identification of pathogenic *Escherichia coli* serotypes, 853.
Chagnon, A. and **Laflamme, P.** Effect of acidity on rubella virus, 501.
Chung, K. L., Hawirko, R. Z., and **Isaac, P. K.** Cell wall replication. I. Cell wall growth of *Bacillus cereus* and *Bacillus megaterium*, 43.
Cell wall replication. II. Cell wall growth and cross wall formation of *Escherichia coli* and *Streptococcus faecalis*, 473.
Clement, M. T. A simple method of maintaining stock cultures by low-temperature storage, 613.
Colvin, J. R. See Webb, T. E., 11.
Colvin, J. R. and **Dennis, D. T.** The shape of the tips of growing bacterial cellulose microfibrils and its relation to the mechanism of cellulose biosynthesis, 763.
Colwell, R. R. See Quadling, C., 87.
Cook, F. D. See Katznelson, H., 699.
Corke, C. T., Robinson, J. B., and **Douglas, R. J.** Serological relationships of soil actinophages, 897.
Correll, D. L. See Lewin, R. A., 75.
Correll, D. L. and **Lewin, R. A.** Rod-shaped ribonucleoprotein particles from *Saprospira*, 63.

Cropp, C. B. and **Harrison, E. F.** The in vitro effect of lysostaphin on clinical isolates of *Staphylococcus aureus*, 823.
Crothers, D. M. See Lewin, R. A., 75.
Daft, G. C. See Leben, C., 919.
Dale, D. G. See Donaldson, J., 163; Joshi, N., 615.
Dempster, G. See Grodums, E. I., 53.
Dennis, D. T. See Colvin, J. R., 763.
Depoux, R. Infection des cellules de glande sous-maxillaire de chien cultivées in vitro par un virus rabique fixe, 527.
Diena, B. B. See Wallace, R., 551.
Diena, B. B., Wallace, R., and **Greenberg, L.** The production and properties of *Salmonella typhi* spheroplasts, 543.
Immunologic studies of glycine-induced spheroplasts of *Salmonella typhi*, 555.
Dobson, M. B. See Kudlac, J. J., 307.
Donaldson, J., Moriarity, A. J., Joshi, N., and **Dale, D. G.** Laboratory evaluation of semisynthetic antibiotics against staphylococci isolated from bovine udder, 163.
Douglas, R. J. See Corke, C. T., 897.
Dowding, E. S. and **Bulmer, G. S.** Notes on the cytology and sexuality of puffbulls, 783.
Dumasia, M. D. See Webb, S. J., 877.
Durham, N. N. See Kudlac, J. J., 307.
Durio, S. N. See Flannery, W. L., 235.
Eagon, R. G. See Carson, K. J., 467.
Fergus, C. L. See Howell, D. McB., 616.
Ferguson, D. See Kudlac, J. J., 307.
Fitz-James, P. C. Polyribosomes in protoplasts of *Bacillus megaterium*, 92.
Flannery, W. L. and **Durio, S. N.** The nutrition of *Vibrio costicolus*. II. Cyst(e)ine utilization, 235.
Fleming, H. P. and **Ordal, Z. J.** Spectrophotometric method for the determination of calcium in bacterial spores, 95.
Fox, J. B. See Woodward, J. M., 573.
Freedman, R. See Waterbury, W. E., 932.
Gale, G. R. Antimicrobial properties of certain glucosamine derivatives, 887.
Garcia Acha, I., Rodriguez Aguirre, M. J., and **Villanueva, J. R.** "Protoplasts" from conidia of *Fusarium culmorum*, 99.
Gascon, S. and **Villanueva, J. R.** Extracellular lytic enzymes of *Micromonospora*, 301.
Gibbins, L. N. and **Simpson, F. J.** The incorporation of D-allose into the glycolytic pathway by *Aerobacter aerogenes*, 829.
Gibbons, N. E. See Hagen, P.-O., 813; Kushner, D. J., 483.
Gillespie, D. C. See Katznelson, H., 699.
Goldner, M. and **Wilson, R. J.** In vivo studies on antistaphylococcal penicillinase serum, 507.
Gorenstein, B. See Pivnick, H., 329.
Grand, L. F. See Krywolap, G. N., 323.
Greenberg, L. See Diena, B. B., 543, 555; Wallace, R., 551.
Griffin, G. J. Long-term influence of soil amendments on germination of conidia, 605.
Griffiths, B. W. and **Mason, M. A.** Immunochemical studies on the antigens of *Bordetella pertussis*, 123.
Grinyer, I. See Musgrave, A. J., 806.
Grinyer, I. and **Musgrave, A. J.** Microorganisms and mitochondria in the Malpighian tubules of *Sitophilus* (Coleoptera), 805.
Grodums, E. I. and **Dempster, G.** Passive neutralizing antibodies in experimental Coxsackie B-1 virus infection, 53.
Groscop, J. A. and **Brent, M. M.** The effects of selected stains of pigmented microorganisms on small free-living amoebae, 579.
Guerin, M. M. See Polley, J. R., 747.
Habeeb, A. F. S. A. A study of the soluble antigens of *Clostridium perfringens* type D, 287.
See also Pivnick, H., 329.
Hagen, P.-O., Kushner, D. J., and **Gibbons, N. E.** Temperature-induced death and lysis in a psychrophilic bacterium, 813.
Harrison, E. F. See Cropp, C. B., 823.
Hartsell, S. E. See Shively, J. M., 905, 911.
Haskins, R. H. See MacDonald, J. C., 90.
Haskins, R. H., Tulloch, A. P., and **Micetich, R. G.** Steroids and the stimulation of sexual reproduction of a species of *Pythium*, 187.
Hauschild, A. H. W. See Pivnick, H., 329.

Hauser, M. M. and **Smith, R. E.** The characterization of lactobacilli from Cheddar cheese. II. A numerical analysis of the data by means of an electronic computer, 757.
Hawirko, R. Z. See Chung, K. L., 43, 473.
Henderson, V. E. See Katznelson, H., 37.
Herr, L. J. See Abraham, T. A., 281.
Hickman, C. J. See Royle, D. J., 151, 201.
Hochster, R. M. See Suzuki, T., 867.
Hoeniger, J. F. M. Cellular changes accompanying the swarming of *Proteus mirabilis*. I. Observations of living cultures, 1.
Homan, R. See Musgrave, A. J., 806.
Howell, D. McB. and **Fergus, C. L.** The component fatty acids found in sclerotia of *Sclerotium rolfsii*, 616.
Iandolo, J. J., Ordal, Z. J., and **Witter, L. D.** The effect of incubation temperature and controlled pH on the growth of *Staphylococcus aureus* MF 31 at various concentrations of NaCl, 808.
Idziak, E. S. and **Thatcher, F. S.** Some physiological aspects of mutants of *Escherichia coli* resistant to gamma irradiation, 683.
Isaac, P. K. Metabolic specialization in the mycelium of *Rhizoctonia solani* Kühn, 621.
See also Chung, K. L., 43, 473.
Ivarson, K. C. See Stevenson, I. L., 139.
Ivarson, K. C. and **Stevenson, I. L.** The decomposition of radioactive acetate in soils. II. The distribution of radioactivity in soil organic fractions, 677.
Jefferys, E. G. See Borrow, A., 407, 445.
Jones, G. A., MacLeod, R. A., and **Blackwood, A. C.** Ureolytic rumen bacteria. I. Characteristics of the microflora from a urea-fed sheep, 371.
Ureolytic rumen bacteria. II. Effect of inorganic ions on urease activity, 379.
Joshi, N. See Donaldson, J., 163.
Joshi, N., Blackwood, A. C., and **Dale, D. G.** Influence of incubation temperature on the demonstration of cytopathogenic effects in tissue culture, 615.
Kates, M. See Kushner, D. J., 483.
Katznelson, H., Gillespie, D. C., and **Cook, F. D.** Studies on the relationships between nematodes and other soil microorganisms. III. Lytic action of soil myxobacters on certain species of nematodes, 699.
Katznelson, H. and **Henderson, V. E.** Studies on the relationships between nematodes and other soil microorganisms. II. Interactions of *Aphelenchoides parietinus* (Bastian, 1865) Steiner 1932 with actinomycetes, bacteria, and fungi, 37.
Kaufman, D. D. Microbial degradation of 2,2-dichloropropionic acid in five soils, 843.
Kessell, R. H. J. See Borrow, A., 407, 445.
Khairat, O. Routine incubation in an 80 plate CO_2 container, 499.
A fermentation tube and medium for fastidious anaerobes, 513.
Kish, Z. L. See Wirth, J. C., 811.
Knowles, R. See Schad, G. A., 801.
Krywolap, G. N. and **Casida, L. E., Jr.** An antibiotic produced by the mycorrhizal fungus *Cenococcum graniforme*, 365.
Krywolap, G. N., Grand, L. F., and **Casida, L. E., Jr.** The natural occurrence of an antibiotic in the mycorrhizal fungus *Cenococcum graniforme*, 323.
Kudlac, J. J., Dobson, M. B., Ferguson, D., and **Durham, N. N.** Response of L-aspartic-4-carboxylase to selected inhibitors, 307.
Kushner, D. J. See Hagen, P.-O., 813.
Kushner, D. J., Bayley, S. T., Boring, J., Kates, M., and **Gibbons, N. E.** Morphological and chemical properties of cell envelopes of the extreme halophile, *Halobacterium cutirubrum*, 483.
Lachance, R.-A. See Paquin, R., 115.
Laflamme, P. See Chagnon, A., 501.
Lamb, D. C. See Bobb, D., 303.
Lawrence, C. H. and **McAllan, J. W.** Characteristics of an inhibitor from *Streptomyces scabies* affecting potato tuber respiration, 299.
Leben, C. and **Daft, G. C.** Characteristics of bacteria isolated from leaves of cucumber seedlings, 919.
Lechevalier, H. A. See Rancourt, M. W., 311.
Ledingham, G. A. See Tulloch, A. P., 351.
Leung, F. C. See Vas, S. I., 561.
Lewin, R. A. See Correll, D. L., 63.
Lewin, R. A., Crothers, D. M., Correll, D. L., and **Reimann, B. E.** A phage infecting *Saprospira grandis*, 75.
Lloyd, E. C. See Borrow, A., 407, 445.

Lloyd, P. B. See Borrow, A., 407, 445.
McAllan, J. W. See Lawrence, C. H., 299.
McCleskey, C. S. See Brown, L. R., 791.
McCready, R. G. L. See Myers, G. E., 317.
McCurdy, H. D., Jr. Growth and fruiting body formation of *Chondromyces crocatus* in pure culture, 935.
McDonald, I. J. Location of proteinase, peptidase, catalase, and NADH oxidase in cells of *Staphylococcus lactis*, 197.
MacDonald, J. C. See Sheikh, N. M., 861.
MacDonald, J. C., Micetich, R. G., and **Haskins, R. H.** Antibiotic activity of neoaspergillic acid, 90.
McFadden, B. A. and **Rao, G. R.** Enzymes of the tricarboxylic acid cycle in *Pseudomonas indigofera*, 503.
McLachlan, J. Some considerations of the growth of marine algae in artificial media, 769.
MacLeod, R. A. See Jones, G. A., 371, 379.
Mandels, M. See Reese, E. T., 103.
Martin, W. R. See Smith, J. L., 267.
Mason, M. A. See Griffiths, B. W., 123.
Medzon, E. L. See Vas, S. I., 561.
Medzon, E. L. and **Vas, S. I.** Studies on in vitro antibody production. II. The effect of Newcastle disease virus on antibody synthesis, 535.
Meerovitch, E. See Schad, G. A., 801.
Micetich, R. G. See Haskins, R. H., 187; MacDonald, J. C., 90.
Miller, D. See Wilt, J. C., 169.
Miller, J. J. See Ramirez, C., 623.
Miraglia, G. J. See Woodward, J. M., 243.
Molina, J. A. E. and **Rovira, A. D.** The influence of plant roots on autotrophic nitrifying bacteria, 249.
Moriarity, A. J. See Donaldson, J., 163.
Morris, O. N. Susceptibility of *Lambdina fiscellaria somniaria* (Hulst) (Geometridae) and *Lambdina fiscellaria lugubrosa* (Hulst) (Geometridae) to viruses from several species of lepidopterous insects, 273.
Musgrave, A. J. See Grinyer, I., 805.
Musgrave, A. J., Homan, R., and **Grinyer, I.** Mycetomal and other microorganisms in young and aging *Sitophilus* (Coleoptera: Curculionidae), 806.
Myers, G. E. and **McCready, R. G. L.** Non-lethal assimilation and distribution of radioactive phosphorus in *Serratia marcescens*, 317.
Narkates, A. J. See Pittillo, R. F., 345.
Neal, J. L., Jr., Bollen, W. B., and **Zak, B.** Rhizosphere microflora associated with mycorrhizae of Douglas fir, 259.
Nichols, J. L. See Campbell, J. N., 659.
Nichols, J. L. and **Campbell, J. N.** Production of a melanin-like pigment as a result of cresol inhibition of normal pigmentation in *Micrococcus violagabriellae*, 633.
Norman, A. G. See Stotzky, G., 143.
Ordal, Z. J. See Fleming, H. P., 95; Iandolo, J. J., 808.
Papavizas, G. C. Survival of single-basidiospore isolates of *Rhizoctonia praticola* and *Rhizoctonia solani*, 739.
Paquin, R. and **Lachance, R.-A.** Effets des glycoalcaloïdes de la pomme de terre sur la croissance de *Corynebacterium sepedonicum* (Spieck. and Kott.) Skapt. and Burkh., 115.
Pittillo, R. F. and **Narkates, A. J.** Folic acid inhibition of non-proliferating bacteria, 345.
Pivnick, H., Habeeb, A. F. S. A., Gorenstein, B., Stuart, P. F., and **Hauschild, A. H. W.** Effect of pH on toxinogenesis by *Clostridium perfringens* type C, 329.
Polley, J. R. A 1-day complement fixation test for virus serology, 504.
Polley, J. R. and **Guerin, M. M.** Preparation of a stable noninfective group-specific adenovirus diagnostic antigen, 747.
Presswood, W. G. See Woodward, J. M., 573.
Quadling, C. and **Colwell, R. R.** Apparatus for simultaneous inoculation of a set of culture tubes, 87.
Ramirez, C. and **Miller, J. J.** The metabolism of yeast sporulation. VI. Changes in amino acid content during sporogenesis, 623.
Ramirez, C. and **Ransom, J. P.** Studies on the causes of reciprocal inhibition of pseudomycelium formation between parallel colonies of yeasts of the genus *Candida*, 931.
Rancourt, M. W. and **Lechevalier, H. A.** Electron microscopic study of the formation of spiny conidia in species of *Streptomyces*, 311.
Ransom, J. P. See Ramirez, C., 931.

Rao, G. R. See McFadden, B. A., 503.
Reese, E. T. and **Mandels, M.** A new α-glucanase: mycodextranase, 103.
Reimann, B. E. See Lewin, R. A., 75.
Robinson, J. B. See Corke, C. T., 897.
Rodriguez Aguirre, M. J. See Garcia Acha, I., 99.
Rothwell, A. See Borrow, A., 407, 445.
Rothwell, B. See Borrow, A., 407, 445.
Rovira, A. D. See Molina, J. A. E., 249.
Royle, D. J. and **Hickman, C. J.** Analysis of factors governing in vitro accumulation of zoospores of *Pythium aphanidermatum* on roots. I. Behavior of zoospores, 151.
Analysis of factors governing in vitro accumulation of zoospores of *Pythium aphanidermatum* on roots. II. Substances causing response, 201.
Ruiter, J. See Wilt, J. C., 169.
Sarett, H. P. See Zygmunt, W. A., 619.
Schad, G. A., Knowles, R., and **Meerovitch, E.** The occurrence of *Lampropedia* in the intestines of some reptiles and nematodes, 801.
Schwinghamer, E. A. Association between antibiotic resistance and ineffectiveness in mutant strains of *Rhizobium* spp., 221.
Sheikh, N. M. and **MacDonald, J. C.** Biogenesis of the N-methyl group of pyocyanine, 861.
Shieh, H. S. Aerobic degradation of choline. I. Fermentation of choline by a marine bacterium, *Achromobacter cholinophagum* n. sp., 837.
Shively, J. M. and **Hartsell, S. E.** Bacteriolysis of the pseudomonads. I. Agents potentiating lysis, 905.
Bacteriolysis of the pseudomonads. II. Chemical treatments affecting the lytic response, 911.
Sierra, G. Hydrolysis of triglycerides by a bacterial proteolytic enzyme, 926.
Germination of bacterial spores by subtilisin, 929.
Simpson, F. J. See Blakley, E. R., 175; Gibbins, L. N., 829.
Singleton, R. J. See Skerman, T. M., 397.
Skerman, T. M. and **Singleton, R. J.** Sulphur nutrition of two strains of the yeast, *Debaryomyces kloeckeri*, isolated from subantarctic soil, 397.
Smith, J. L. and **Martin, W. R.** Esterase activity in an ethyl acetate producing yeast, 267.
Smith, R. E. See Hauser, M. M., 757.
Stansberry, M. H. See Woodward, J. M., 573.
Stevenson, I. L. See Ivarson, K. C., 677.
Stevenson, I. L. and **Ivarson, K. C.** The decomposition of radioactive acetate in soils, 139.
Stine, G. J., Strickland, W. N., and **Barratt, R. W.** Methods of protein extraction from *Neurospora crassa*, 29.
Stotzky, G. and **Norman, A. G.** Factors limiting microbial activities in soil. III. Supplementary substrate additions, 143.
Strawinski, R. J. See Brown, L. R., 791.
Strickland, W. N. See Stine, G. J., 29.
Stuart, P. F. See Pivnick, H., 329.
Stull, H. B. See Altenbern, R. A., 717.
Suzuki, T. and **Hochster, R. M.** Pseudouridine from culture media of *Agrobacterium tumefaciens*, 867.
Swait, J. C. See Borrow, A., 407, 445.
